

1

STRENGTHS	WEAKNESSES
Scalable MERN stack	High system complexity
Modular microservice-like architecture	Integration challenges between modules
Real-time booking management	Security and Data Privacy Concerns
AI-powered analytics and chatbot	Maintenance and System Updates

2

OPPORTUNITIES	THREATS
Growing hotel digital transformation	Security risks
Potential SaaS solution for hotels	Payment gateway reliability
Real-time booking management	Network or server downtime

3

4

5

6

Payment, Billing & Invoice management

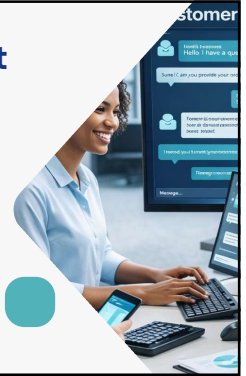

- Process booking payments securely
- Automatically generate invoices after payment
- Track payment status and handle refunds

7

Customer Support Chatbot

- Provide instant responses to customer questions
- Help users find information about bookings and services
- Assist hotel staff in managing customer feedback

8

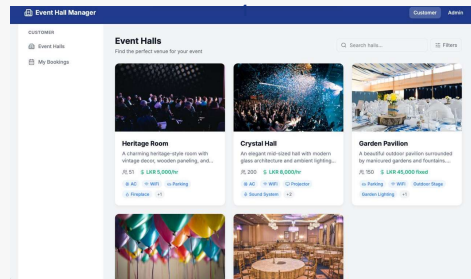

Hotel Room management with Dynamic pricing

- Allow users to search and book available rooms
- Manage room details and availability
- Apply dynamic pricing based on demand and dates
